The Times-Union doesn't like the tine and timber leases. In fact the Vinces-Union doesn't appear to like any law that seeks to secure for the stant an equable share in the burdeas of government from those interests that have found it "a snap" to thrive on special privileges. "Newspaper Day" in England. March 11 ought to be named "news-paper day," for on it, in the year 1702, was published the first daily paper. It was produced by E. Mallet, "against the ditch at Fieet bridge"-i. e., on or near the site of the present Printing House square. Of a single page, two columns, the Dally Courant professed to give foreign news only, without edi-torial comments, the chief of staff "supposing other people to have sense enough to make reflections for themselves." This original sheet soon passed into the hands of Samuel Buckley, "at the sign of the Dolphin in Little Britain," the worthy printer of the Spectator and one "well affected" to the house of Hanover. The Courant was in 1735 absorbed in the Daily Ga-
